

PRIYANSHU KHANDELWAL

AI Engineer | LLM Systems | ML Engineering | Backend Integration

+91 9251081117 | priyanshusharma9251@gmail.com | github.com/anshu9251 | linkedin.com/in/priyanshu92 | Jaipur, India

PROFESSIONAL SUMMARY

AI Engineer with experience building LLM-powered applications, agentic automation pipelines, and production-grade AI systems. Proficient in the end-to-end ML lifecycle — from data preprocessing, feature engineering, and model fine-tuning to evaluation, model serving, and deployment. Skilled in RAG architectures, embeddings, prompt engineering, and integrating Hugging Face Transformers and LLMs into real-world products. Currently pursuing a Credit-Linked Data Science Program at IIT Guwahati.

TECHNICAL SKILLS

AI / ML: Scikit-learn, PyTorch, TensorFlow, Hugging Face Transformers, YOLO · Fine-tuning, Embeddings, End-to-End ML Pipeline, Feature Engineering, Data Preprocessing, Hyperparameter Tuning, Model Training, Evaluation & Deployment, MLflow

LLMs & Agents: LangChain, GPT-4, OpenAI API, Claude API, RAG (Retrieval-Augmented Generation), Embeddings, Prompt Engineering, Few-Shot Learning, LangChain Agents, n8n, Agentic Workflow Automation, Model Serving

Backend & APIs: Python, FastAPI, Django REST Framework, Flask, REST API Design, JWT / OAuth, Serialization

Databases & Infra: PostgreSQL, MongoDB, Vector Databases, Docker, Git, CI/CD, Linux, AWS / GCP (Familiarity)

Languages: Python, SQL, JavaScript, C++, Java

EXPERIENCE

AI Engineer | Jiyasys · Mar 2026 – Present · Remote

- Architected Edwiser — an AI psychometric platform using the OCEAN Five Factor Model; integrated GPT-4 for LLM-based career recommendations and built a FastAPI + Uvicorn backend with Pydantic validation.
- Designed agentic automation pipelines using n8n and OpenClaw, streamlining internal business workflows and reducing manual overhead across operations.
- Built React + Vite frontend with Recharts dashboards for real-time personality score visualization and career pathway display.

Systems & AI Developer | RK Cloud Software Ltd · Mar 2025 – Jan 2026 · On-site

- Trained and evaluated ML models (Random Forest, ANN, CNN) for classification tasks, managing the full ML lifecycle: preprocessing, feature engineering, training, and performance benchmarking.
- Engineered an end-to-end automated social media content pipeline using n8n, GPT models, and image generation APIs — auto-publishing daily and festival-specific posts to client accounts.
- Built a GPT-powered WhatsApp bot via n8n automation to handle user interactions and orchestrate the content workflow end-to-end.

Machine Learning Intern | Afame Technologies · Jan 2024 – Jul 2024 · Remote

- Built a Credit Card Fraud Detection system using Extra Tree Classifier; resolved class imbalance via strategic under-sampling, improving model recall on the minority class.
- Applied end-to-end ML practices — data cleaning, feature engineering, model selection, evaluation, and experiment tracking with MLflow — delivering clean, reproducible pipeline results.

PROJECTS

RAG-Powered AI Chatbot — Python, PyTorch, LangChain, Vector Store

- IIT Guwahati × Masai Hackathon — built a RAG pipeline using Hugging Face Transformers embeddings and vector semantic search, combined with a fine-tuned PyTorch LLM served via REST API for contextually grounded responses. Awarded for technical depth and end-to-end delivery.

Real-Time Phone Detection System — Python, YOLO, Roboflow

- Trained a custom YOLO model on Roboflow-annotated datasets for real-time phone detection in video streams; evaluated using mAP, precision, and recall.

Book & Movie Recommender System — Python, TF-IDF, Collaborative Filtering, Streamlit

- Recommendation engine using TF-IDF, cosine similarity, and collaborative filtering — served via a live Streamlit frontend for real-time personalized suggestions.

EDUCATION

Credit-Linked Data Science Program · IIT Guwahati × Masai School · Oct 2024 – Present

Bachelor of Computer Applications (BCA) · Aryan College · 2020 – 2023 · 75%

Class XII — CBSE · MIS · 2020 · 73%

CERTIFICATIONS & ACHIEVEMENTS

- Coursera Machine Learning Certificate — supervised & unsupervised learning, model evaluation, Python-based ML.
- Salesforce Administrator Virtual Internship (AICTE) — CRM workflow automation, data management, and access control.
- Top Intern Award, Afame Technologies — recognized for outstanding ML contributions and clean code delivery.
